

WE ARE LOOKING FOR

RESEARCH ASSISTANTS / DOCTORAL CANDIDATES (M / W / D)

LET'S DO RESEARCH ABOUT THE SUCCESS OF STARTUP TEAMS!

Our research team is looking for research assistants – with the possibility to work on a doctoral degree - in a research project that seeks to predict the success of start-up teams.

**Start**

As soon as possible

**Time of contract**

initially limited to 1 year

**Application deadline**

31.12.2021

**Workload**

Parttime or fulltime

Startups often fail because of interpersonal difficulties instead of a poor business model. Our interdisciplinary research team wants to examine how we can better match people to form successful start-up teams. With secondary trace data and primary experimental data, we will investigate interactions of team members and track their performance over a period of 2 years. This research design will allow us to analyze the successful compositions of start-up teams and their causal effects on the start-ups' performance.

YOUR ROLE

- Analyze systematically scientific and impactful literature on the topic
- Set up the overall research design
- Data collection and analysis
- Write up and distribution of study results

YOUR PROFILE

We look for smart, enthusiastic, open-minded people who work accurately, precisely, and independently, have the ability to capture and structure complex information quickly, have a strong interest in research, very good grades, and speak German and English. Preferred study fields: psychology (ideally focus on neuropsychology) or computer science or related fields.

You want to better get to know us and always be up to date?
